

Helping globally mobile students reach their education potential

Perfect Match Tool

We synthesize the student's academic profile, individual preferences, and pre-professional interests to produce the best-fit list of universities for that specific individual

Strategy Advisor

We teach the student both what qualities and experiences the admissions' committees value, and how to best express these achievements, giving the student the best chance of success

Manage My Process

We grant students access to organizational tools, and helpful resources so that they can stay organized throughout the process, and manage both preparation and application from a single dashboard

Created for international students by global experts

BridgeU was born from a desire to create tools to make the global student journey easier to navigate and easier to leverage to the benefit of the student.

Our software platform is the result of input from higher education specialists, international school principals, and guidance counselors with experience in four continents.
